The Cycle of War and the Coronavirus Dec 15 2019 The global economy deteriorated in a matter of months due to governments' mishandling of the coronavirus outbreak. General observers may describe this event as "unforeseen," but they fail to look at the patterns of the past that reveal the future. Cyclical behavior dominates every facet of our world, including warfare, civil unrest, and even pandemics. "The Cycle of War and the Coronavirus" is the most comprehensive review of the war cycle from the beginning of recorded history. The civil unrest prevailing on a worldwide basis can be traced to events of the past, as it is cyclically on time for a revolution. However, the current pandemic is by no means a natural occurrence—this a deliberate attempt to radicalize the world in the vision of those pulling strings behind the curtain. This book exposes the truth, explaining why the coronavirus outbreak destroyed the global economy, the culprits, and what we can expect in the short-term and long-term volatile future.

Theory and Applications of Partial Functional Differential Equations Apr 30 2021

Abstract semilinear functional differential equations arise from many biological, chemical, and physical systems which are characterized by both spatial and temporal variables and exhibit various spatio-temporal patterns. The aim of this book is to provide an introduction of the qualitative theory and applications of these equations from the dynamical systems point of view. The required prerequisites for that book are at a level of a graduate student. The style of presentation will be appealing to people trained and interested in qualitative theory of ordinary and functional differential equations.

Infrastructure Sustainability Through New Developments in Material, Design, Construction, Maintenance, and Testing of Pavements Jun 20 2020 This book includes a collection of research and practical papers aiming with key priority for improving the infrastructural sustainability for our well-being and day-to-day lives through novel developments. The united efforts through new developments in material, design,

construction, maintenance, and testing of pavements from all over the world are taken under one umbrella. Topics include issues related to civil infrastructure such as the use of construction waste, recycled aggregates, service life prediction of pavements, mechanical behavior of SMA, control measures of ready mixed concrete, determination of landslide high-risk areas, Simulation of rock hydraulics in rock joint, sustainable planning for provision of basic infrastructural facilities in rural areas. It is anticipated that this book will support decisions regarding the optimal management and maintenance of civil infrastructures to support a more resilient and sustainable environment for infrastructure users.

Handbook of Solid Modeling Apr 18 2020 A complete reference and working guide to this vitally important methodology, presenting valuable advice and insight from more than 30 of the top international design experts. Computer Aided Design of Multivariable Technological Systems Sep 16 2022 *Computer Aided Design of Multivariable Technological Systems* covers the proceedings of the Second International Federation of Automatic Control (IFAC). The book reviews papers that discuss topics about the use of Computer Aided Design (CAD) in designing multivariable system, such as theoretical issues, applications, and implementations. The book tackles several topics relevant to the use of CAD in designing multivariable systems. Topics include quasi-classical approach to multivariable feedback system designs; fuzzy control for multivariable systems; root loci with multiple gain parameters; multivariable frequency domain stability criteria; and computational algorithms for pole assignment in linear multivariable systems. The text will be of great use to professionals whose work involves designing and implementing multivariable systems.

Low Reynolds Number Aerodynamics Jun 13 2022 Current interest in a variety of low Reynolds number applications has focused attention on the design and evaluation of efficient airfoil sections at chord Reynolds numbers from about 100,000 to about 1,000,000. These applications include remotely piloted vehicles (RPVs) at high altitudes, sailplanes, ultra-light man-carrying/man powered aircraft, mini-RPVs at low altitudes and wind turbines/propellers. The purpose of this conference was to bring together those researchers who have been active in areas closely related to this subject. All of the papers presented are research type papers. Main topics are: Airfoil Design and Analysis, Computational Studies,

Stability and Transition, Laminar Separation Bubble, Steady and Unsteady Wind Tunnel Experiments and Flight Experiments.

Budgeting for Infertility Feb 21 2023 Having a baby can be one of the most wonderful times of your life -- but if you need help to conceive, it can swiftly become a staggeringly expensive undertaking. With the average cost of infertility treatments ranging from \$35,000 to \$85,000 in the United States (most of which is not covered by insurance companies), many women and couples find themselves having to make difficult choices about building their families. Getting a grip on your finances is one of the few things you can do to regain control of this process. Infertility experts Evelina Weidman Sterling and Angie Best-Boss have created the ultimate guide to ensuring the most cost-effective care with the highest chances for success. With anecdotes, interviews, and advice from both doctors and patients, you can easily apply these specific money-saving strategies to your own unique situation. Learn how to: - Select a fertility clinic with a high rate of success - Convince your insurance company to cover more of the costs - Track down the most affordable fertility drugs - Travel abroad for cheaper care or international surrogacy - Avoid the scams and unnecessary expenses every step of the way Personal and professional, Budgeting for Infertility is an invaluable resource that shows you how to pay for infertility treatment...and still have money in the bank for diapers and day care.

5th International Conference on Digital Enterprise Technology Oct 17 2022 Digital Enterprise Technology (DET) is more than a concept. Companies are facing new challenges in a context where the references are mostly numerical. Nowadays, digital methods and tools are widely generalized. DET 2008 allowed excellent exchanges about "the collection of systems and methods for the digital modelling and analysis of the global product development and realisation process, in the context of lifecycle management". This book of proceedings gives a short version of the keynotes and proposes the text of the papers that have been presented during DET 2008. This gives a clear view of the actual state of the art and of the industrial needs. This book of proceedings is organized with respect to the topics that were addressed during the conference.
