Following on from his bestselling Religion for Atheists, Alain de Botton turns now to look at the manic and peculiar positions that 'the news' occupies in our lives. We invest it with an authority

and importance which used to be the preserve of religion - but what does it do for us? Mixing current affairs with philosophical reflections, de Botton offers a brilliant illustrated guide to the precautions we should take before venturing anywhere near the news and the 'noise' it generates. Witty and global in reach, The News will ensure you'll never look at reports of a celebrity story or political scandal in quite the same way again. Praise for Religion for Atheists: 'Smart and stimulating . . . a sensitive analysis of the deeply human needs that faith meets' Financial Times 'A

serious and optimistic set of practical ideas that could improve and alter the way we live . . . energetic and on the side of the angels' Jeanette Winterson, The Times 'Packed with tantalising goads to thought and playful prompts to action' Independent Alain de Botton's bestselling books include Religion for Atheists, How Proust Can Change Your Life, The Art of Travel, and The Architecture of Happiness. The Ultimate User Guide to Learn Amazon Dot In No Time (Amazon Dot, user manual, smart devices, web services, digital services, digital media) The smallest version in Amazon's Echo Family is the Dot. Dot is a lot like Echo, in fact it really does look like a sibling of the largest unit. The main difference between the two is that Dot lacks the powerful speaker of the Echo Unit, alternatively, Dot can be plugged directly into another speaker or connect via bluetooth to enjoy music and communicate with

Alexa. Both units are dependent on being plugged into a wall socket for power. Where Echo is the all knowing and all powerful, Dot is the great connector. All Echo units feature Alexa and Dot is no exception. Regardless of where she is (Echo, Tap or Dot) Alexa is always learning about her users' preferences. Use of Alexa is inherent to all Echo devices and allows for an almost totally hands-free management of home systems and hardware. Dot tethers to speakers and other smart home equipment, allowing the user to make queries, listen to music, get recipe ingredients, ask for the latest news and

even order take out or an Uber to get it! Dot's small, on-board speaker allows timer and alarm clock functionality. From the nightstand Dot can control the temperature of the home, the lighting level and set an alarm for the morning. Alexa is available in app form for FireOS, iOS, AndroidOS and desktop browsers which facilitates easy set up and management of the Dot device. Alexa can be used to connect to Spotify or other similar services like Google calendar and also to set up technology to be used in a smart home situation. Customize alert and alarm tones, buy the newest kindle

release and organize an Audible library. Dot is only available to Amazon Prime members with a current Fire TV or Echo, and Alexa voice shopping is the only way to purchase a unit.
