A captivating blend of personal biography and public drama, *The Wise Men* introduces the original best and brightest, leaders whose outsized personalities and actions brought order to postwar chaos: Averell Harriman, the freewheeling diplomat and Roosevelt's special envoy to Churchill and Stalin; Dean Acheson, the secretary of state who was more responsible for the Truman Doctrine than Truman and for the Marshall Plan than General Marshall; George Kennan, self-cast outsider and intellectual darling of the Washington elite; Robert Lovett, assistant secretary of war, undersecretary of state, and secretary of defense throughout the formative years of the Cold War; John McCloy, one of the nation's most influential private citizens; and Charles Bohlen, adroit diplomat and ambassador to the Soviet Union. This book reveals the mother of all conspiracies. It sets forth biblical proof and irrefutable evidence that will cause the scales to fall from your eyes and reveal that the world you thought existed is a myth. The most universally accepted scientific belief today is that the earth is a globe, spinning on its axis at a speed of approximately 1,000 miles per hour at the equator, while at the same time it is orbiting the sun at approximately 66,600 miles per hour. All of this is happening as the sun, in turn, is supposed to be hurtling through the Milky Way galaxy at approximately 500,000 miles per hour. The Milky Way galaxy, itself, is alleged to be racing through space at a speed ranging from 300,000 to 1,340,000 miles per hour. What most people are not told is that the purported spinning, orbiting, and speeding through space has never been proven. In fact, every scientific experiment that has ever been performed to determine the motion of the earth has proven that the earth is stationary. Yet, textbooks ignore the scientific proof that contradicts the myth of a spinning and orbiting globe.

Christian schools have been hoodwinked into teaching heliocentrism, despite the clear teaching in the bible that the earth is not a sphere and does not move. This book reveals the evil forces behind the heliocentric deception, and why scientists and the Christian churches have gone along with it. In the Sixth Edition of their classic text, the authors reiterate the critical importance of observing and recording the behaviour of young children, especially in the current atmosphere of accountability and testing. In addition, because children with special needs are now widely included in a majority of early childhood classrooms, they have completely rewritten a chapter to focus more broadly on observing behaviours that may be viewed as disquieting. Designed to help teachers better understand children's behaviour, the book outlines methods for recordkeeping that provide a realistic picture of each child's interactions and experiences in the classroom. Numerous examples of teachers' observations of children from birth to age 8 enrich this work and make it accessible, practical, and enjoyable to read. With over 130,000 copies in print, this valuable resource for pre- and inservice educators features: fresh information about how children think and learn, how their language develops, and how their families, their culture, and their environment influence and help to shape them; observations that reflect the increasingly diverse population in contemporary early childhood classrooms; and the imperative for teachers to widen their lens in order to meet the needs of young children with a range of developmental capacities, abilities, and behaviours. 20 years GATE Computer Science & Information Technology Chapter-wise & Topic-wise Solved Papers (2000 - 2019) is the 6th fully revised & updated edition covering fully solved past 20 years question papers (all sets totalling to 24 papers) from the year 2000 to the year 2019. The illustrations are outstanding, and the balanced combination of line art and photographs provides effective coverage of the material.
