He finds it by chance, buried in the potato paddock where he is working with his father, and immediately he knows that he has wanted a knife of his own for a long time. It is special. It is his knife. But is it really chance that has led him to its discovery? Colyn soon learns that there is not only beauty in the knife, but magic too; and with magic come power and danger. For, with his knife, Colyn opens a doorway into a mysterious otherworld, and here he becomes involved in an adventure more exciting and more perilous than he could ever have imagined. Ugo Catani's *A Summer Shower* in Collins Street, 1889, sets the scene for Andrew May's invitation to walk the streets of Melbourne, imagine the everyday past, and see the urban landscape with new eyes. For the author, as for artists like Catani and Tom Roberts, the street frames the ever-changing throng of the wealthy and down-and-out, the passers-by, shoppers, idlers, hawkers, cabbies, entertainers, beggars, larrikins, prostitutes, custodians and law-breakers. It is the stage of ritual, procession and protest and the site of proud architecture, fine trees and public utilities. And it also has its hazards, of traffic, animals, assault, falling buildings, fire. Original and vital in subject and tone, this

award-winning book is a rich commentary on the growth and transformation of a great Australian city. What makes a policy work? What should policies attempt to do, and what ought they not do? These questions are at the heart of both policy-making and ethics. Philosophy, Ethics and Public Policy: An Introduction examines these questions and more. Andrew I. Cohen uses contemporary examples and controversies, mainly drawn from policy in a North American context, to illustrate important flashpoints in ethics and public policy, such as: public policy and globalization: sweatshops; medicine and the developing world; immigration marriage, family and education: same-sex marriage; women and the family; education and Intelligent Design justifying and responding to state coercion: torture; reparations and restorative justice the ethics of the body and commodification: the human organ trade, and factory farming of animals. Each chapter illustrates how ethics offers ways of prioritizing some policy alternatives and imagining new ones. Reflecting on various themes in globalization, markets, and privacy, the chapters are windows to enduring significant debates about what states may do to shape our behavior. Overall, the book will help readers understand how ethics can frame policymaking, while also suggesting that sometimes the best policy is no policy. Including annotated further reading, this is an excellent introduction to a fast-growing subject for students in Philosophy, Public Policy, and related disciplines. This volume presents an objective diplomatic history focused on five crucial years in the relations between Russia and the Balkan states from the Annexation Crisis of 1908-9 to the outbreak of the First World War. Andrew Otter makes a few mistakes before he learns how to be honest and tactful at the same time. Knoll explores the deep history of life from its origins on a young planet to the incredible Cambrian explosion, with the very latest discoveries in paleontology integrated with emerging insights from molecular biology and earth system science. 100 illustrations. NEW PAPERBACK EDITION 'Salmon's vivid use of recollections and dramatic quotes brings alive an unjustly forgotten conflict' Time Out With even World War II now just on the edges of living memory, and with British forces now engaged in a lengthy, brutal and

attritional old-fashioned war in Afghanistan, historical attention is starting to turn to the Korean War of the early 1950s. And remarkably, the most notorious and celebrated battle in that conflict, from a British point of view, has never previously been written about at length. Andrew Salmon's book, which has garnered excellent reviews and sold out two hardback printings already, has filled that gap. This is the story of the Battle of the Imjin River, when the British 29th Infantry Brigade, and above all the "Glorious Glosters" of the Gloster Regiment, fought an epic last stand against the largest communist offensive of the war. It lasted three days, of bitter hand-to-hand combat. By the end of it one battalion of the Glosters - some 750 men - had been reduced to just 50 survivors. Andrew Salmon's definitive history, which gained excellent reviews in hardback and sold very steadily, is very much in the Antony Beevor mould: accessible, pacy, narrative, and painting a moving and exciting picture through the extensive use of eyewitness accounts of veterans, of whom he has tracked down and interviewed dozens. Andrew Salmon is a Seoul-based journalist who writes for The Times, The Washington Times, and Forbes magazine. He first became fascinated by the battle in 2001 when he met British veterans returning to the Imjin River to mark the 50th anniversary. Mathematics scares and depresses most of us, but politicians, journalists and everyone in power use numbers all the time to bamboozle us. Most maths is really simple - as easy as 2+2 in fact. Better still it can be understood without any jargon, any formulas - and in fact not even many numbers. Most of it is commonsense, and by using a few really simple principles one can quickly see when maths, statistics and numbers are being abused to play tricks - or create policies - which can waste millions of pounds. It is liberating to understand when numbers are telling the truth or being used to lie, whether it is health scares, the costs of government policies, the supposed risks of certain activities or the real burden of taxes. "Charlie Wilson is about to have a totally amazing adventure. In the process he will become an explorer, a magician, a detective, and a grave robber. Then, finally, he'll become a killer ..." [Back cover]. Andrew wants freckles so badly that he buys Sharon's freckle recipe for fifty cents. "For Gerald Manston and his

friends 'Shifty Shanks' and 'Fu Manchu' cycling round Kingston is the biggest excitement in their lives until the 'upheaval' when many of the city's working people go on strike and take to the streets. Gerald's father is an organiser in the new union fighting for a better life, but even he would be alarmed - if he found out - by how close Gerald and his friends get to the action ..."--Back cover. Andrew Loog Oldham was the original manager of the Rolling Stones, created their image, and made Mick Jagger and Keith Richards into songwriters. Andrew is a provocatively interesting and even sympathetic character. . . . The novel seamlessly combines Doctorow's remarkable prowess as a literary stylist with deep psychological storytelling pitting truth against delusion, memory and perception, consciousness and craziness. . . . [Doctorow] takes huge creative risks—the best kind."—USA Today "Andrew's Brain is cunning. . . . [A] sly book . . . This babbling Andrew is a casualty of his times, binding his wounds with thick wrappings of words, ideas, bits of story, whatever his spinning mind can unspool for him. . . . One of the things that makes [Andrew] such a terrific comic creation is that he's both maddeningly self-delusive and scarily self-aware: He's a fool, but he's no innocent. . . . Andrew may not be able to enjoy his brain, but Doctorow, freely choosing to inhabit this character's whirligig consciousness, can."—The New York Times Book Review "A tantalising tour de force . . . a journey worth taking . . . With exhilarating brio, the book plays off . . . two contrasting takes on mind and brain. . . . Samfundsatirisk roman om England i tiden 1945-70 Explains how to better understand the world and make more responsible consumer choices using accessible mathematical principles, in a guide that redefines the concepts of averages, risks, and statistics. A fully updated edition of Gimson's 2006 biography, with new material covering Boris's years as Mayor of London. His distinctive appearance ('Like a

haystack on a bicycle'), befuddled manner and ready wit have assured a high media profile and a large fanbase with the general public. In 2008 he was elected Mayor of London with over 1 million votes, the largest personal mandate of any UK politician. In this, the first and most authoritative biography of Boris, Andrew Gimson investigates Boris' twin-faced dilemma - politics or entertainment - and asks how deep his political ambition runs. Boris has transcended his class, education and his various occupations (Mayor of London, Conservative MP for Henley-on-Thames, Conservative spokesman for Higher Education, columnist on the Daily Telegraph, motoring correspondent for GQ, novelist, TV presenter) to become a paradoxical character - the old Etonian who fascinates teenagers as well as grandparents, the classical scholar who is also a TV quiz-show contestant. Despite being a comic actor of genius, he is not just an act and Andrew Gimson's biography covers all facets of this complex individual. There is his exotic Turkish ancestry, his place among five siblings, his competitive relationship with his father Stanley, the distinguished university career, his five years as a journalist in Brussels, his first failed venture into politics ('I fought Clwyd South - and Clwyd South fought back'), overseeing the Spectator during the David Blunkett affair and the Liverpool editorial fiasco which led to Boris' sacking from the shadow cabinet, his exile and return under David Cameron, his two marriages, four children and love affairs. Interviewing Boris' contemporaries, his family and his detractors, Andrew Gimson has created a fascinating and amusing portrait of this unique man of our times.
