21st Century U.S. Military Manuals Nov 24 2020 The Combatives Field Manual (FM 3-25.150, FM 21-150) contains information and guidance pertaining to rifle-bayonet fighting and hand-to-hand combat. The hand-to-hand combat portion of this manual is divided into basic and advanced training. This manual serves as a guide for instructors, trainers, and soldiers in the art of instinctive rifle-bayonet fighting. Topics covered include hand-to-hand combat, rifle-bayonet fighting, knife assault, and fighting techniques. Hand-to-hand combat is an engagement between two or more persons in an empty-handed struggle or with hand-held weapons such as knives, sticks, or projectile weapons that cannot be fired. Proficiency in hand-to-hand combat is one of the fundamental building blocks for training the modern soldier. Soldiers must be prepared to use different levels of force in an environment where conflict may change from low intensity to high intensity over a matter of hours. Many military operations, such as peacekeeping missions or noncombatant evacuation, may restrict the

use of deadly weapons. Hand-to-hand combatives training will save lives when an unexpected confrontation occurs. More importantly, combatives training helps to instill courage and self-confidence. With competence comes the understanding of controlled aggression and the ability to remain focused while under duress. Training in combatives includes hard and arduous physical training that is, at the same time, mentally demanding and carries over to other military pursuits. The overall effect of combatives training is - the culmination of a successful physical fitness program, enhancing individual and unit strength, flexibility, balance, and cardiorespiratory fitness; building personal courage, self-confidence, self-discipline, and esprit de corps. This field manual has been converted for accurate flowing-text e-book format reproduction. As a bonus, this reproduction includes FM-1, The Army Field Manual, a capstone manual containing the vision for the Army - sold separately for \$5.99. FM 1 establishes the fundamental principles for employing Landpower. The most important of these are the Army's operational concept and the fundamentals that support it. They form the foundation for all Army doctrine. All Soldiers should understand and internalize them. FM 1 describes the American profession of arms, the Army's place in it, and what it means to be a professional Soldier. This is a privately authored news service and educational publication of Progressive Management.

Storming the City Jan 15 2020 In an increasingly urbanized world, urban terrain has become a greater factor in military operations. Simultaneously, advances in military technology have given military forces sharply increased capabilities. The conflict comes from how urban terrain can negate or degrade many of those increased capabilities. What happens when advanced weapons are used in a close-range urban fight with an abundance of cover? Storming the City explores these issues by analyzing the performance of the US Army and US Marine Corps in urban combat in four major urban battles of the mid-twentieth century (Aachen 1944, Manila 1945, Seoul 1950, and Hue 1968). Alec Wahlman assesses each battle using a similar framework of capability categories, and separate chapters address urban warfare in American military thought. In the four battles, across a wide range of conditions, American forces were ultimately successful in capturing each city because of two factors: transferable competence and battlefield adaptation. The preparations US forces made for warfare writ large proved generally applicable to urban warfare. Battlefield adaptation, a strong suit of American forces, filled in where those overall preparations for combat needed fine tuning. From World War Two to Vietnam, however, there was a gradual reduction in tactical performance in the four battles.

21st Century U.S. Military Manuals Mar 17 2020 The Marine Troop Leader's Guide (FMFRP 0-6) provides a checklist of basic duties for the troop leader at the platoon, section, squad, and fire team levels in combat operations. This FMFRP includes the specific duties of troop leaders in the amphibious and helicopterborne assault, offensive and defensive operations ashore, selected operations other than war, and special types of land operations. RIFLE PLATOON - The mission of the rifle platoon is to locate, close with, and destroy the enemy by fire and maneuver, or to repel the enemy's assault by fire and close combat. In addition to the procedures prescribed for all troop leaders the rifle platoon commander will: Plan and conduct the tactical training of the rifle platoon in accordance with company training directives. Direct and control the tactical employment of the rifle platoon in combat and training operations through the use of appropriate troop leading procedures. Prepare and revise estimates of the situation continually during the conduct of operations in order to more effectively accomplish assigned tactical missions. Coordinate the employment of the rifle platoon with adjacent units and, as appropriate, with units supporting the platoon mission. Ensure the timely requisition,

distribution, safeguarding, and economical use of supplies and equipment.

Manual for Soviet Mosin-Nagant Feb 25 2021 mosin-Nagant rifle was adopted in Italy imperial Russia. The action of the rifle was developed by Colonel S. I. Mosin of the Imperial Russian Army, and the magazine was developed by Nagant, a Belgian. All Soviet bolt action military rifles and carbines are Mosin-Nagant weapons and all are basically similar to the original Mosin-Nagant rifle adopted by Russia in 1891. These weapons can be considered reasonably effective infantry weapons. Fairly good shooting can be done with them at combat ranges, although their sights do not lend themselves to the finer degrees of accuracy which can be obtained with similar United States weapons. They suffer from an overcomplicated bolt, but in other respects are relatively simple to service and maintain. The safety, in that it is extremely hard to engage and disengage, represents a shortcoming of the weapons.
