Products Liability Depositions is a book entirely devoted to the subject of how to go about preparing for and taking depositions that will provide you with the necessary materials for building a successful case. The book contains sample depositions from actual cases that illustrate the many techniques that can be used to develop useful testimony. It also provides practical and time saving suggestions on how to prepare for taking the important depositions in a products liability case. The book also provides a handy source of quick information regarding the legal doctrines that apply to products liability cases. There is a section briefly describing the substantive law applicable to products cases from each of the 50 states. This section allows quick access to answers such as what affirmative defenses are available to a strict liability claim in a given state. This section alone makes this book a necessary addition to any products liability lawyers office library.**

This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using the EPA test procedure and standard for off-road vehicles. Innovative technology solutions include: • Engine Design: improving the two-stroke, gas direct injection (GDI) engine • Applications of new muffler designs and a catalytic converter • Solving flex-fuel design and engine power problems The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal**

**combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive. The primary objective of the report was to provide reservoir managers with technical and economic information regarding the possible methods for controlling the levels of MTBE and BTEX in reservoir water supplies. This report comprehensively evaluates options to give practical data and advice to water managers who wish to consider the benefits of dual use (use to store drinking water supplies and use as recreational attractions) without introducing unacceptable health risks into the water bodies being managed.
