*THE ABORTION OF DEMOCRACY* Feb 21 2023 'Only allow ourselves to praise and honor make-believe, and the next thing will be to find it creeping into the very business of state.'-Solon What is Democracy actually? Can you describe it? I would bet large sums of money that you can't... You might ask, "But how can this be? We live in a Democracy don't we? Are we not educated?" Defining Democracy seems like such a simple thing to do yet the evidence proves otherwise. We are here to discuss this paradox and to journey forward we are forced to acknowledge one simple and quite startling fact: THE FORM OF GOVERNMENT WE IDENTIFY AS 'DEMOCRACY' TODAY IS NOT, I REPEAT, IS NOT ACTUALLY DEMOCRACY! Question: Why are juries selected randomly by lottery? Why don't we elect jury members if election is such a vastly superior method of obtaining the best individuals to weigh crucial decisions? The hard truth of the matter is that, to the corrupt, true democracy is just bad for business. In other words, the 'Abortion of Democracy' did not happen by chance.

*Foreign Affairs and the Constitution in the Age of Fighting Sail* Aug 03 2021 Discusses the United States "Neutrality Crisis" of 1793.

**Publications of the Modern Language Association of America** Apr 30 2021 Vols. for 1921-1969 include annual bibliography, called 1921-1955, American bibliography; 1956-1963, Annual bibliography; 1964-1968, MLA international bibliography.

**Political Terrain** Jan 16 2020 Washington, D.C., President John F. Kennedy once remarked, is a city of "southern efficiency and northern charm." Kennedy's quip was close to the mark. Since its creation two centuries ago, Washington has been a community with multiple personalities. Located on the regional divide between North and South, it has been a tidewater town, a southern city, a coveted prize in fighting between the states, a symbol of a reunited nation, a hub for central government, an extension of the Boston-New York megalopolis, and an international metropolis. In an exploration of the many identities Washington has taken on over time, Carl Abbott examines the ways in which the city's regional orientation and national symbolism have been interpreted by novelists and business boosters, architects and blues artists, map makers and politicians. Each generation of residents and visitors has redefined Washington, he says, but in ways that have utilized or preserved its past. The nation's capital is a city whose history lives in its neighborhoods, people, and planning, as well as in its monuments and museums.

**Science and Religion** Nov 06 2021 Science and Religion assesses the impact of social, political and intellectual change upon Anglican circles, with reference to Oxford University in the decades that followed the French Revolution and the Napoleonic wars. More particularly, the career of Baden Powell, father of the more famous founder of the Boy Scout movement, offers material for an important case-study in intellectual and political reorientation: his early militancy in right-wing Anglican movements slowly turned to a more tolerant attitude towards radical theological, philosophical and scientific trends. During the 1840s and 1850s, Baden Powell became a fearless proponent of new dialogues in transcendentalism in theology, positivism in philosophy, and pre-Darwinian evolutionary theories in biology. He was for instance the first prominent Anglican to express full support

for Darwin's *Origin of Species*. Analysis of his many publications, and of his interaction with such contemporaries as Richard Whately, John Henry and Francis Newman, Robert Chambers, William Benjamin Carpenter, George Henry Lewes and George Eliot, reveals hitherto unnoticed dimensions of mid-nineteenth-century British intellectual and social life.

**Abstracts of the Papers Printed in the Philosophical Transactions of the Royal Society of London** Jun 13 2022

*Tomorrow's Air Force* Nov 18 2022 “A bold and courageous clarion call from a highly respected serving officer that should be read and heeded by anyone interested in the future of the US Air Force.” —Everett Dolman, School of Advanced Airpower Studies Looking ahead to future airpower requirements, this engaging and groundbreaking book on the history and future of American combat airpower argues that the US Air Force must adapt to the changes that confront it or risk decline into irrelevance. To provide decision makers with the necessary analytical tools, Jeffrey J. Smith uses organizational modeling to help explain historical change in the USAF and to anticipate change in the future. While the analysis and conclusions it offers may prove controversial, the book aims to help planners make better procurement decisions, institute appropriate long-term policy, and better organize, train, and equip the USAF for the future. “Those airmen willing to actively engage such discussions would do well to turn to Smith’s book as the basic point of departure for debates concerning the intricate relationship between the Air Force’s past, present, and future.” —Strategic Studies Quarterly “This book is ‘out of the box’ thinking and is very timely given the recent and evolving Air Force roles and missions.” —Brigadier General Al Rachel, USAF (Ret.) “Colonel Smith has a great grasp of what the forthcoming debate will require. The Congress must reduce the spending at the very time our enemies are overtaking our capabilities. The debate needs to be engaged now. This book comes on the scene at just the right time.” —Denny Smith former US Congressman and Air Force F-4 pilot

Death Education in the Writing Classroom Feb 15 2020 Death is often encountered in English courses—Hamlet’s death, celebrity death, death from the terrorist attacks on 9/11—but students rarely have the opportunity to write about their own experiences with death. In *Death Education in the Writing Classroom*, Jeffrey Berman shows how college students can write safely about dying, death, and bereavement. The book is based on an undergraduate course on love and loss that Berman taught at the University at Albany in 2008. Part 1, “Diaries,” is organized around Berman’s diary entries written immediately after each class. These entries provide a week-by-week glimpse of class discussions, highlighting his students’ writings and their developing bonds with classmates and teacher. Part 2, “Breakthroughs,” focuses on several students’ important educational and psychological discoveries in their understanding of love and loss. The student writings touch on many aspects of death education, including disenfranchised grief. The book explores how students write about not only mourning and loss but also depression, cutting, and abortion—topics that occupy the ambiguous border of death-in-life. *Death Education in the Writing Classroom* is the first book to demonstrate how love and loss can be taught in a college writing class—and the first to describe the week-by-week changes in students’ cognitive and affective responses to death. This interdisciplinary book will be of interest to writing teachers, students, clinicians, and bereavement counselors.

*The Papers of Thomas Jefferson: Retirement Series, Volume 14* Jul 14 2022 The 637 documents in this volume span 1 February to 31 August 1819. As a founding member of the University of Virginia Board of Visitors, Jefferson helps to obtain builders for the infant institution, responds to those seeking professorships, and orchestrates the establishment of a classical preparatory school in Charlottesville. In a letter to Vine Utley, Jefferson details his daily regimen of a largely vegetarian diet, bathing his feet in cold water each morning, and horseback riding. Continuing to indulge his wide-ranging intellectual interests, Jefferson receives publications on the proper pronunciation of Greek and discusses the subject himself in a letter to John Adams. Jefferson also experiences worrying and painful events, including hailstorm damage at his Poplar Forest estate, a fire in the North Pavilion at

Monticello, the illness of his slave Burwell Colbert, and a fracas in which Jefferson's grandson-in-law Charles Bankhead stabs Jefferson's grandson Thomas Jefferson Randolph on court day in Charlottesville. Worst of all, Jefferson's financial problems greatly increase when the bankruptcy of his friend Wilson Cary Nicholas leaves Jefferson responsible for \$20,000 in notes he had endorsed for Nicholas.

Chinese Encyclopaedias of New Global Knowledge (1870-1930) Jan 08 2022 This is a set of pioneering studies on Chinese encyclopaedias of modern knowledge (1870-1930). At a transitional time when modern knowledge was sought after yet few modern schools were available, these works were crucial sources of information for an entire generation. This volume investigates many of these encyclopaedias, which were never reprinted and are hardly known even to specialists, for the first time. The contributors to this collection all specialize in the period in question and have worked together for a number of years. The resulting studies show that these encyclopaedias open a unique window onto the migration and ordering systems of knowledge across cultural and linguistic borders.

*The Best American History Essays 2006* Nov 25 2020 Ten of the best articles in American history published in 2006 selected from over 300 learned and popular journals. Topics range from the general to the specific and cover all aspects of American history, from the early days of the republic through the nineteenth and twentieth centuries. These are the questions that today's historians are asking.

**The Business of Abolishing the British Slave Trade, 1783-1807** Mar 10 2022 This study presents new information about the four Quaker businessmen who helped found the London Abolition Committee in 1787 and remained active in the late anti-slave trade movement throughout their lifetimes. Drawing on previously unused primary sources, the study traces the close personal, business, social and religious ties binding the men together and shaping their abolition activities and arguments. By closely examining the lives of Joseph Woods, James Philips, George Harrison and Samuel Hoare, the study presents a new view of the factors shaping the arguments and strategies of abolitionism in Britain.

**The Young Charles Darwin** Jul 22 2020 This book is the first to inquire into the range of influences and ideas, the mentors and rivals, and the formal and informal education that shaped Charles Darwin and prepared him for his remarkable career of scientific achievement. Keith Thomson concentrates on Darwin's early life as a schoolboy, a medical student at Edinburgh, a theology student at Cambridge, and a naturalist aboard the Beagle on its famous five-year voyage

Dying to Teach Feb 09 2022 Affirms the power of writing to memorialize loss and work through grief.

Herman Melville Jan 28 2021 The first of a two-volume biography of Melville traces his life from his childhood in New York, through his adventures abroad as a sailor, to his creation of Moby-Dick.

Supreme Court Justice Joseph Story Dec 27 2020 The primary founder and guiding spirit of the Harvard Law School and the most prolific publicist of the nineteenth century, Story served as a member of the U.S. Supreme Court from 1811 to 1845. His attitudes and goals as lawyer, politician, judge, and leg

*Introduction to Digital Transformation* Jun 01 2021 This book aims to inform the non-IT specialist about the technological revolution that is taking place and, specifically, how the digital component of it is affecting our lives. It is hoped that this information will fill possible information gaps in readers' mental model, enabling them to make better-informed decisions. This book can also be used as a textbook in a stand-alone introductory course to the digital revolution and its effects on society. The course could be used in both bachelor and master degree programs in business management, healthcare management, sociology, or any other non-IT programs. Chapter 1. This chapter, although the longest, is a brief review of the interactions between technology, economy, and politics. The subject is a much neglected one, and I believe that understanding of these interactions is vital for

understanding the underlying causes of some of our most important pressing issues. The chapter discusses the interactions between technologies, economy, and politics, examining the effect of technologies on economic development and political ideologies. Chapter 2. This chapter deals with technological revolutions in general and the digital revolution in particular. I shall discuss the components of the digital economy. These being: knowledge, digitisation, virtualisation, molecularization, integration/internetworking, disintermediation, convergence, innovation, sharing economy, immediacy, and discordant. In addition, we shall examine the disruptors that are changing the face of competition in the marketplace. Chapter 3. This chapter deals with digital transformation, i.e., the process of using digital technology in all areas of business, changing the way the businesses operate and deliver value to their customers. We shall examine models for dealing with digital transformation. Chapter 4. We shall examine one of the most important developments of the 21st century, namely the advancements in Artificial Intelligence (AI). We shall look at how the human brain works and what is intelligence. We shall look at the artificial neural networks, machine learning, and deep learning. We shall also look at the deployment of AI in various fields such as healthcare, finance, Natural Language Processing (NLP), news media, and warfare. Chapter 5. This chapter deals with one of the most controversial and yet promising developments in finance and distributed secure databases, namely cryptocurrencies and blockchains. This subject is divided into two parts — the first part deals with the cryptocurrencies, and their viability as currencies. One of the most popular cryptocurrencies, the Bitcoin, will be examined in depth. The second part is somewhat technical and deals with the inner workings of the blockchains. As with cryptocurrencies, many see a bright future for the blockchains, especially in the form of smart contracts. Many believe that blockchains will be of great value in areas such as finance, handling contracts, healthcare and more. Blockchain promises to bring disintermediation to many industries and thereby reduce costs. Chapter 6. Technological revolutions tend to disrupt the lives of many middle-aged and older workers. New technologies give birth to new industries, destroying the old industries in the process. New technologies often require special skills that the old industry workers do not possess. The laid-off workers of the old industries can seldom find jobs in new industries since the new industries often rely on new technologies and skills that the old-industry workers do not possess. These workers need training, something that the prospective employers do not provide. Also, the new technologies, including AI, are automating many tasks, reducing the need for human workers. This chapter discusses the issue of automation and its effect on employment. Additionally, the type of jobs that are in danger of automation is discussed as well. Chapter 7. While chapter six discussed the employment situation, chapter seven considers the type of education required by the new industries. Also, the weaknesses of the existing educational system are considered, and alternative systems are proposed. Chapter 8. History tells us that whenever there has been a technological revolution, it has been accompanied by a shift in power, both nationally and internationally. The global shift of power has seldom been a peaceful affair. It often has resulted in major wars and global reorientation. This chapter discusses the possibility of the global shift of power. Currently, there are not that many countries or entities that can be considered as contenders. Of the three, Russia, European Union, and China, only one, China, is considered to have any chance of wresting power from the United States. The technological, economic and military power of China is compared and contrasted with the United States’.

The Printer's Trial Apr 18 2020 Covers the trial of printer John Peter Zenger in New York in 1735 who was charged with libel against the British governor for his political criticisms, a case that led to a precedent that helped inspire the creation of the Bill of Rights more than five decades later.

*Frederick Temple, Archbishop of Canterbury* Oct 05 2021 Born on a Greek island of middle class but impoverished parents Temple was educated at Balliol on a scholarship, and later became headmaster of Rugby, before becoming Archbishop of Canterbury at the age of 76 in 1897. This is a biography of his life.

Proceedings, American Philosophical Society (vol. 87, 1944) Aug 23 2020

**New Selected Essays** Aug 15 2022 There isn't a dull or conventional page, or an unlovely sentence in the book.--Scott Eyman, *The Palm Beach Post*  
The Debates and Proceedings in the Congress of the United States Jul 02 2021

**Under Wraps** Dec 07 2021 Menstruation provides one of the few shared bodily functions that most women will experience during their lifetimes. Yet, these experiences are anything but common. In the United States, for the better part of the twentieth century, menstruation went hand-in-glove with menstrual hygiene. But how and why did this occur? This book looks at the social history of menstrual hygiene by examining it as a technology. In doing so, the lens of technology provides a way to think about menstrual artifacts, how the artifacts are used, and how women gained the knowledge and skills to use them. As technological users, women developed great savvy in manipulating belts, pins, and pads, and using tampons to effectively mask their entire menstrual period. This masking is a form of passing, though it is not often thought of in that way. By using a technology of passing, a woman might pass temporarily as a non-bleeder, which could help her perform her work duties and not get fired or maintain social engagements like swimming at a summer party and not be marked as having her period. How women use technologies of passing, and the resulting politics of secrecy, are a part of women's history that has remained under wraps.

*A Short History of Political Economy in England* Mar 30 2021 The books reprinted in this set greatly influenced the way the development of economics was perceived and how the history of economics was viewed. Many of the titles represent the first attempts to chart the history of economics both from European and American perspectives. Titles cover the USA, UK, Germany and France, and include: \* *History of Political Economy from Antiquity to our days* [1880]-"Jerome Adolphe Blanqui" \* *View of the Progress of Political Economy in Europe* [1847]--"Travers Twiss" \* *A Short History of Political Economy in England* [1891]-"L.L. Price" \* *The History of Economics* [1896/1911]-"Henry Dunning MacLeod" \* *History of Economic Thought* [1911/1930]-"Lewis H. Haney" \* *History of Economic Doctrines* [1915]-"Charles Gide" and "Charles Rist" \* *Types of Economic Theory* [1930]-"Othmar Spann" \* *Philosophy and Political Economy in Some of their Historical Relations* [1893]-"James Bonar" \* *The Development of English Thought: a Study in the Economic Interpretation of History* [1899]-"Simon N. Patten" \* *A Guide to the Study of Political Economy* [1876]-"Luigi Cossa"

The History of Epidemics in Britain (The Complete Two-Volume Edition) Nov 13 2019 *A History of Epidemics in Britain* in two volumes is the most significant work of Charles Creighton, British physician and medical author. The work is divided in two parts. First volume covers the history of epidemics from 664 A.D., the year of the first pestilence in Britain which was chosen as a starting-point, to the extinction of plague in 1665-66, which marks the end of a long era of epidemic sickness, including leprosy, poxes, various plagues, fevers and influenzas. The disappearance of plague marks the beginning of new era and of the second volume, which covers the period from 1666 to the end of 19th century. Dealing also with social and economic history, the author presents the broad image of the state of civilization which saw the emergence of typhus, cholera and many other kinds of fevers, influenzas and epidemics. The book is recognized as an important contribution to the study of medical history.

*The English Press in the Eighteenth Century (Routledge Revivals)* May 12 2022 First published in 1987, this is a comprehensive analysis of the rise of the British Press in the eighteenth century, as a component of the understanding of eighteenth century political and social history. Professor Black considers the reasons for the growth of the "print culture" and the relations of newspapers to magazines and pamphlets; the mechanics of circulation; and chronological developments. Extensively illustrated with quotations from newspapers of the time, the book is a lively as well as original and informative treatment of a topic that must remain of first importance for the literate historian.

*Abstracts of the Papers Communicated to the Royal Society of London* Apr 11 2022

The Appeal of L. Louaillier, Sen., Against the Charge of High Treason Mar 18 2020

The Wesleyan-Methodist Magazine Jun 20 2020

**Herman Melville: 1819-1851** Feb 26 2021 Traces Melville's life from his childhood in New York, through his adventures abroad as a sailor, to his creation of "Moby-Dick," and forty years later, to his death, in obscurity.

**'Of Genius', in The Occasional Paper, and Preface to The Creation** Dec 19 2022 DigiCat Publishing presents to you this special edition of "'Of Genius', in The Occasional Paper, and Preface to The Creation" by Aaron Hill. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

**Democracies in America** Sep 04 2021 Ask someone their thoughts about "democracy" and you'll get many different responses. Some may presume it a thing once established yet now under threat. Others may believe that democracy has always been compromised by the empowered few. In the contemporary United States, marked by constituencies across the political spectrum believing that their voices have gone unheard, "democracy" gets wielded in so many divergent directions as to be rendered nearly incoherent. *Democracies in America* reminds us that this reality is nothing new. Focusing on the various meanings of "democracy" that circulated in the long nineteenth century, the book collects twenty-five essays, each taking up a keyword in the language we use to talk about democracy. Penned by a group of diverse intellectuals, the entries tackle terms both commonplace (citizenship and representation) and paradigm-stretching (disgust and sham). The essays thus consider the relationship between "America" and "democracy" from multiple disciplinary angles and from different moments in a major historical period-amidst the vitality of the revolutionary epoch, in the contentious lead-up to the Civil War, and through the triumphs and failures of Reconstruction and the early reforms of the Progressive Era-while making both forward and backward glances in time. The book frames its keywords around a series of enduring democratic dilemmas and questions, and provides extensive resources for further study. Ultimately the volume cultivates, for students and teachers in classrooms, as well as citizens in libraries and cafés, a language to deliberate about the possibilities and problems of democracy in America.

The Publishers' Circular and Booksellers' Record of British and Foreign Literature Sep 16 2022

*Francophone Writing in Transition* Oct 13 2019 In this volume, Francophone Algerian writing is studied as the hesitant articulation of strategies of alternative representation and, however modest, of deviance as a form of resistance.

The Platform of Time Sep 23 2020 Taking family, friends and servants as her subjects, Woolf presents a series of impressions of the people around her. And as she describes their lives - including a piece on her nephew Julian Bell, and sketches on Lady Ottoline Morrell and Lady Strachey - she also reveals her attitudes - to her writing, war and education.

**A History of Epidemics in Britain (Vol. 1&2)** Dec 15 2019 A History of Epidemics in Britain in two volumes is the most significant work of Charles Creighton, British physician and medical author. The work is divided in two parts. First volume covers the history of epidemics from 664 A.D., the year of the first pestilence in Britain which was chosen as a starting-point, to the extinction of plague in 1665-66, which marks the end of a long era of epidemic sickness, including leprosy, poxes, various plagues, fevers and influenzas. The disappearance of plague marks the beginning of new era and of the second volume, which covers the period from 1666 to the end of 19th century. Dealing also with social and economic history, the author presents the broad image of the state of civilization which saw the emergence of typhus, cholera and many other kinds of fevers, influenzas and

epidemics. The book is recognized as an important contribution to the study of medical history.

The Enlightenment in Practice Oct 25 2020 Public academic prize contests-the concours académique-played a significant role in the intellectual life of Enlightenment France, with aspirants formulating positions on such matters as slavery, poverty, the education of women, tax reform, and urban renewal and submitting the resulting essays for scrutiny by panels of judges. In The Enlightenment in Practice, Jeremy L. Caradonna draws on archives both in Paris and the provinces to show that thousands of individuals-ranging from elite men and women of letters artisans, and peasants-participated in these intellectual competitions, a far broader range of people than has been previously assumed. Caradonna contends that the Enlightenment in France can no longer be seen as a cultural movement restricted to a small coterie of philosophers or a limited number of printed texts. Moreover, Caradonna demonstrates that the French monarchy took academic competitions quite seriously, sponsoring numerous contests on such practical matters as deforestation, the quality of drinking water, and the nighttime illumination of cities. In some cases, the contests served as an early mechanism for technology transfer: the state used submissions to identify technical experts to whom it could turn for advice. Finally, the author shows how this unique intellectual exercise declined during the upheavals of the French Revolution, when voicing moderate public criticism became a rather dangerous act.
