This in-depth, extensively illustrated guide reveals a world-class SAP coder's own reality-tested solutions to typical programming tasks. It explores topics and techniques that are simply not covered, or not as clearly covered, elsewhere. From writing basic reports to performing SAP updates, dozens of examples show you just how to do it or how to do it better! Key topics include: a detailed framework for creating an ABAP/4 program; data retrieval and display; developing an interface for data from legacy systems; providing user interaction with displayed data; external data access; and using the SAP debug facility. An accompanying CD-ROM contains all of the SAP code referenced in the text, along with detailed techniques for coding and specific explanations of the methods used. Easily master JavaScript (JS) with this quick guide and develop mobile and desktop applications for SAP Fiori. This book equips ABAP/SAP developers with the essential topics to get started with JS. The focus of JavaScript Essentials for SAP ABAP Developers is on the parts of the JS language that are useful from the perspective of an ABAP developer. The book starts with a brief intro to HTML, the basics of JS, and how to create and run a simple JS program. It then dives into the details of the language, showing how to make simple programs. It covers loops in detail, mathematical operations, and string and regular expressions in JS, as well as a taste of functions, followed by objects and object-oriented programming in JavaScript. The book provides: Sample code and screenshots to help you fully understand JS A chapter on JS best practices and recommendations Differences and comparisons of the elements and data structures of ABAP and JavaScript to help you quickly master the material What You'll Learn Create and run a simple JavaScript program Understand loops, operations, and expressions Master the Create and Use functions Use objects and object-oriented programming in JS Apply the best practices of JS programming Who This Book Is For SAP programmers and developers, ABAP users and developers, and university students learning ABAP and JavaScript You've worked with ABAP, SAP Fiori, and OData--now see how these technologies and more come together in the ABAP RESTful programming model! Build on your expertise to create cloud-ready applications for SAP S/4HANA and deploy applications to the SAP Fiori launchpad. Manage applications with Git version control,

automated testing, and continuous integration. Make the new model work for you! 1) ABAP RESTful programming model 2) End-to-end development 3) SAP S/4HANA 4) SAP Fiori Elements 5) Business objects 6) Deployment 7) Core data services (CDS) 8) OData services 9) Automated testing 10) Continuous integration 11) SAP Cloud Platform

a. ABAP RESTful Programming Model Develop web-based SAP HANA-optimized ABAP applications for SAP S/4HANA. Master the new ABAP RESTful programming model, from queries, business objects, and business services, to its relationship to SAP Fiori and SAP Gateway.

b. SAP Fiori Elements and Freestyle Applications Get the step-by-step instructions you need to create list reports, overview pages, analytical list pages, and freestyle applications. See how the ABAP RESTful programming model incorporates core data services, business object behaviors, OData, and more.

c. Deployment and Operations Once your applications are developed, deploy them to the SAP Fiori launchpad. Implement Git version control, automated backend and frontend testing, and continuous integration.

The first book to comprehensively cover the new object-oriented generation of SAP's programming language ABAP. Officially-approved guide and reference to a core SAP topic Written by SAP consultants, this title provides the stepping stone for individuals waiting to break into the SAP arena. It serves as a reference guide to the seasoned consultant, a tutorial to the individual trying to learn ABAP/4, and as an explanation of the new functionality, including SAP's integration into the Web. Sample applications are provided on the CD-ROM.

DESCRIPTION The book has been written in such a way that the concepts are explained in detail, giving adequate emphasis on examples. To provide clarity on the programming examples, logic is properly explained and discussed by using comments in the program itself. The topics covered in this book include starting the software using snapshots of the same and writing programs. Simple to complex SAP/ ABAP HANA examples are provided in detail, considering the requirement of IT consultants the basic idea of developing projects in it. The examples provided in this book are user-focused and are provided through sections, figures, and examples.

KEY FEATURES Comprehensive coverage of SAP / ABAP HANA with emphasis on real-time case studies. Practical examples along with Screen personas, SAP Fiori cloud, OPEN SQL, Native SQL & ADBC, CDS support in SAP NW ABAP 7.4 SP5, SAP HANA Studio, performance enabler Rules & guidelines. Simple language, crystal clear approach, straightforward comprehensible presentation. Concepts are duly supported with examples. Topic coverage with the aim to fill the skill gap between industry and academia. SAP Business Suite powered by SAP HANA are helpful for developing projects for IT consultants This book is written in simple, easy to understand format with lots of screenshots and step-by-step explanations. If you are an ABAP developer and consultant looking forward to build advanced SAP programming applications with ABAP, then this is the best guide for you. Basic knowledge of ABAP programming would be required. SAP is the largest pure applications software vendor in the world, but gaining high-level SAP expertise can be difficult. Now a SAP insider offers the first guide to writing specific types of reports and programs within SAP using real-world ABAP Release 4 examples. This book and CD-ROM tame the massive nature of the information and integration inherent to SAP, as well as the complex ABAP programming language. "Writing SAP ABAP/4 Programs" will be invaluable to IS professionals who must maintain the SAP system once the initial consultant has moved on. A volume in the McGraw-Hill SAP Series. Are you an aspiring ABAP cook looking for professional ABAP recipes? Or are you already the executive chef in your ABAP kitchen, just looking for new ideas? Either way, you will find classic and new recipes in ABAP Objects and ABAP/4 for common and specific development tasks in this ABAP Cookbook! This book quickly provides answers to typical ABAP development problems or tasks: persistence programming, interface programming, security and tracing techniques, etc. You'll discover best practices in developing solutions, and you can use this book to broaden your skills and see how to apply ABAP to solve various types of problems. The complexity of the recipes ranges from the simple starter plates to the complex main courses - and some sweet desserts, of course! Each chapter is a short tutorial in itself, all organized and consolidated into an easy-to-read format. Many code samples, screenshots, and different icons will help you to follow the best practices provided. Enjoy your ABAP meal!

1. Best Practices Learn best practices for programming and the solutions to both simple

and complex programming problems. 2. Programming Techniques Discover various techniques for dynamic, database, transactional, persistence, interface, and security programming in ABAP. 3. Comprehensive Approach to Problem Solving Explore the context of a problem, solution alternatives, and the thought process involved in the development of a solution. 4. Instructive Icons Easily identify quick tips, step-by-step instructions, and warnings, thanks to the use of helpful icons throughout the text. 5. Numerous Examples and Source Codes Explore coding examples in every chapter, as well as two source code bundles that you can install on your local AS ABAP system. Highlights: String Processing Techniques Working with Numbers, Dates, and Bytes Dynamic and Reflective Programming ABAP and Unicode Working with Files Database Programming Transactional Programming XML Processing in ABAP Interacting with the ICF Web Services Sending E-Mails Using BCS Programming for Security Logging and Tracing Interacting with the Operating System Inter-process Communication Parallel and Distributed Processing with RFCs Before use, standard ERP systems such as SAP R/3 need to be customized to meet the concrete requirements of the individual enterprise. This book provides an overview of the process models, methods, and tools offered by SAP and its partners to support this complex and time-consuming process. It begins by characterizing the foundations of the latest ERP systems from both a conceptual and technical viewpoint, whereby the most important components and functions of SAP R/3 are described. The main part of the book then goes on to present the current methods and tools for the R/3 implementation based on newer process models (roadmaps). In this thoroughly updated third edition of INTRODUCTION TO ABAP/4 PROGRAMMING FOR SAP, you will find real-world examples that will help you master ABAP, the main language used for building solid-state business applications in the SAP runtime environment. This book contains a learn-by-doing tutorial with real-world business examples for programming in today's most powerful client-server environment. From the basics of tables, displays, loops, and conditional operators to tuning and troubleshooting techniques to web service calls, object orientation, or enhancing system performance, this tutorial is a must for anyone developing in the SAP environment. Whether you've already spent thousands on official training or learned SAP on your own, this book offers comprehensive technical knowledge on reports, interfaces, data extracts, and testing. Take control with INTRODUCTION TO ABAP/4 PROGRAMMING FOR SAP, THIRD EDITION. You do not require much effort to be proficient in SAP ABAP language if you have access to right learning resource. With this book, you can begin with your first SAP ABAP program in minutes. The book makes ABAP program as simple as reading the specification doc, analyze the requirements and start coding. This book will give you a quick tour on basic concepts like an internal table, structures & field symbols, data dictionary, and so on. Whether you're writing programs for HR, SD, FI, or one of the many other modules within SAP the guidelines in this book will help across all your SAP modules. To save users efforts, the abstract of SAP ABAP is put together in an understandable format. Images, examples, and code will teach you how to create database tables and lists, work with fields and calculations, and debug your code for errors in no time. For Beginners this book can be a gateway to learn SAP ABAP. They can use this edition as a personal guide. They can learn various control command and practice them in real ABAP environment. SAP Business Suite powered by SAP HANA are helpful for developing projects for IT consultants WHAT WILL YOU LEARN Gaining Customers by adopting and implementing SAP HANA in organisations / projects / programs Facilitating to maintain Customer Relationships as the core of all successful working relationships are two essential characteristics: trust and commitment. To demonstrate their trustworthiness and commitment to customers, progressive suppliers periodically provide evidence to customers of their accomplishments. Help in delivering "Superior Value and Getting an Equitable Return" as understanding value in business markets and doing business based on value delivered gives suppliers the means to get an equitable return for their efforts. This document is a compilation of SAP ABAP/4 coding and efficiency standards and will provide guidance in creating readable, maintainable code. It is intended for all developers in the SAP R/3 system. This document is based primarily on ABAP/4. WHO THIS BOOK IS FOR Person from IT domain having software background, preferably with SAP technical or techno functional or functional or domain knowledge. Table of Contents 1. Introduction 2. General Programming Standards 3. ABAP Internal Names 4. ABAP/4 Dictionary 5. Security Authorisations considerations 6. ABAP/4 Coding Techniques With this book, the thousands of new ABAP/4 programmers will learn the most advanced techniques required to develop custom applications using SAP's R/3 system and the Internet. Real-life examples are presented to support every topic. This book features the same highly readable yet deeply detailed format that made the authors' previous work, Introduction to ABAP/4 Programming for SAP R/3, so successful. The authors draw on their recent cutting edge work integrating R/3 and the Internet as well as their years of industry experience. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. Learn by Doing—From Experts Who Know Real-world business examples show you how to get started. The top two SAP implementation sites in the country consulted with the authors, offering practical hands-on experience to guide you through the basics of tables, displays, loops, and conditional operators. In this thoroughly updated third edition of INTRODUCTION TO ABAP/4 PROGRAMMING FOR SAP, you'll find real-world examples that will help you master ABAP, the main language used for building solid-state business applications in the SAP runtime environment. Whether you've already spent thousands on official training or learned SAP on your own, this book offers comprehensive technical knowledge on reports, interfaces, data extracts, and testing. Take control with INTRODUCTION TO ABAP/4 PROGRAMMING FOR SAP, THIRD EDITION. Understand ABAP objects—the object-oriented extension of the SAP language ABAP—in the latest release of SAP NetWeaver 7.5, and its newest advancements. This book begins with the programming of objects in general and the basics of the ABAP language that a developer needs to know to get started. The most important topics needed to perform daily support jobs and ensure successful projects are covered. ABAP is a vast community with developers working in a variety of functional areas. You will be able to apply the concepts in this book to your area. SAP ABAP Objects is goal directed, rather than a collection of theoretical topics. It doesn't just touch on the surface of ABAP objects, but goes in depth from building the basic foundation (e.g., classes and objects created locally and globally) to the intermediary areas (e.g., ALV programming, method chaining, polymorphism, simple and nested interfaces), and then finally into the advanced topics (e.g., shared memory, persistent objects). You will know how to use best practices to make better programs via ABAP objects. What You'll Learn Know the latest advancements in ABAP objects with the new SAP Netweaver system Understand object-oriented ABAP classes and their components Use object creation and instance-methods calls Be familiar with the functions of the global class builder Be exposed to advanced topics Incorporate best practices for making object-oriented ABAP programs Who This Book Is For ABAP developers, ABAP programming analysts, and junior ABAP developers. Included are: ABAP developers for all modules of SAP, both new learners and developers with some experience or little programming experience in general; students studying ABAP at the college/university level; senior non-ABAP programmers with considerable experience who are willing to switch to SAP/ABAP; and any functional consultants who want or have recently switched to ABAP technical. Designed as a comprehensive reference for programmers and SAP users or as review for certification, SAP ABAP Handbook includes all the major concepts related to ABAP programming. With an easy-to-follow writing style, it begins with an explanation of the SAP ERP system and progresses to the architecture of SAP R/3 to SAP ERP ECC 6.0. A complete glossary of terms is included to help the reader understand the myriad terms and programming issues associated with this language. Topics covered include dialogs, ABAP dictionary, error messages, programming in the ABAP Editor, Business Add-Ins, SAPscript, internal tables, accessing data in a SAP system, modularization techniques and more. This book helps newcomers to ABAP gain an instant sense of achievement, while hurdling up the learning curve towards the development their own source code. The author's practical "on the job" approach ensures that you'll quickly familiarize yourself with all of the most important aspects of ABAP programming. Using straightforward examples, you'll begin learning how to build your own programming solutions starting right on the first page. From the single-line ABAP report to modularized flow control and complex data transfer structure, step-by-step instructions with volumes of commented code samples and screenshots serve to ensure your rapid progress in the world of ABAP programming. Getting started with ABAP Learn everything you'll need to get started: Architecture of the SAP system, development tools, and structure of ABAP reports Your first ABAP report Create your first report, maintain its properties, create its source code, and execute it Follow along with an extended real-life example Starting on the first page, a simple, ongoing example guides you through the book as you create database tables and lists, calculate with numbers, and find program errors with the ABAP Debugger Take your skills to the next level Make case distinctions, implement control structures and branches, and learn about logical expressions, selection screens, and the modularization of programs Learn ABAP the easy way Benefit from concise learning units, helpful tips and tricks, numerous screenshots, and comprehensive sample code Highlights Include: \* Data Dictionary and ABAP Editor \* Fields and Calculations \* Calculating with Date and Time, Quantities, and Currencies \* Transparent Database Tables, Internal Tables \* Flow Control and Logical Expressions \* Selection Screens This e-book is designed for those who want to have all the wizards of the ABAP/4 Language, so you have

to consult a comfortable support while you work. "This book presents methods of reengineering business curricula in order to use ES solutions. It also helps ES vendors understand the higher education environment so they can support college and university programs"--Provided by publisher.

ABAP's object-oriented concepts let you develop flexible, self-contained software, completely independent of standard SAP applications. But doing so is challenging, even for experienced software architects. This book addresses this issue by showing you, in a hands-on, step-by-step manner, how to successfully navigate the development process with ABAP Objects. First, uncover the requirements critical for designing application systems, and how to model the application object. Then, you'll benefit from expert guidance on the application system in general, including how to split an application into packages, define dependencies, and develop interfaces. Finally, with the authors' help, you'll tackle the greatest challenge of them all: implementing the application layer. GUI programming, SAP Business Partner, and special application programming techniques are also carefully explained in detail. Complete with chapters on information acquisition and managing development projects, this comprehensive programming guide is a must for every serious ABAP developer. A comprehensive guide to SAP RFC programming using ABAP/4 and Visual Basic. Virtually loaded with fully tested source code, five full data integration projects are detailed. Ideal for the programming novice and a good reference for the seasoned SAP professional. Das Buch führt in verständlicher Weise in die praktische Nutzung der Business Application Programming Interfaces (BAPIs) ein und klärt zunächst die wesentlichen Begriffe, die hinter dieser neuen SAP®-Technologie stehen. Das Buch zeigt eine empfehlenswerte Vorgehensweise für die Einführung und Realisierung der System-Kopplung zwischen R/3® am Beispiel von Lotus Notes. An Hand eines in nahezu jedem Unternehmen relevanten Ablaufs wird exemplarisch die Umsetzung eines Geschäftsprozesses der Kundenauftragsabwicklung gezeigt. Das neue Wissen wird mit Hilfe der beigelegten CD, die auch ScreenCams beinhaltet, plastisch und leicht verständlich vermittelt. Das Buch verfolgt im wesentlichen zwei Ziele: Es zeigt, welchen Nutzen die BAPIs bieten, um externe Systeme an ein R/3® System anzubinden, und wie hoch der Realisierungsaufwand ist. Es versetzt den Leser in die Lage, die Funktionsweise von R/3® und die angebotenen BAPIs und Lotus Notes nicht nur schnell zu verstehen, sondern auch Geschäftsprozesse schnell und zuverlässig in die Praxis umzusetzen. ABAP to the Future is back, and better than ever! Looking for the latest in ABAP syntax? The code examples are fully rewritten. Need to start working in the cloud with the ABAP RESTful application programming model? We've got you covered. Got a new IDE like SAP Business Application Studio? We'll show you the ins and outs of your environment. From abapGit and ABAP2XLSX to SAPUI5 and Web Dynpro ABAP, this new edition has everything you need to be on the cutting edge! SAP ABAP (Advanced Business Application Programming) offers a detailed tutorial on the numerous features of the core programming platform, used for development for the entire SAP software suite. SAP ABAP uses hands on business oriented use cases and a valuable dedicated e-resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. SAP ABAP covers the latest version (NetWeaver 7.3 and SAP application programming release 6.0) of the platform for demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive, practical one stop solution, which demonstrates and conveys the language's commands and features through hands on examples. The accompanying e-resource is a take off point to the book. SAP ABAP works in tandem with the accompanying e-resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature/command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e-resource, where a step-by-step guide to creating and running the feature's object is available. The presentation of the features is scenario oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature/command are conveyed through execution of these hands-on programs.

Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects including the programs rely on some of the SAP application tables being populated, for example an IDES system which is now a de facto system for all SAP training related activities. There's more to ABAP than procedural programming. If you're ready to leap into the world of ABAP Objects--or are already there and just need a refresher--then this is the book you've been looking for. Thanks to explanations of basic concepts, practical examples that show OOP in action, and updates for AS ABAP 7.4, you'll find answers to questions you didn't even know you had. Clear Conceptual Explanations Master the basics with easy-to-understand explanations that make coding with classes and objects seem like second nature. Practical Examples The best way to learn is by doing. Download source code to practice your skills in object cleanup and initialization, inheritance, polymorphism, and more. Updates for New Releases and Tools Make sure your skills are up to date with the latest information on how AS ABAP 7.4 will affect your object-oriented programming. Highlights: Working with objects Encapsulation and implementation hiding Object initialization and cleanup Inheritance Polymorphism Component-based design Exceptions ABAP Unit ALV object model Object Services BOPF Written by two of the product's developers, this book covers all basic ABAP/4 language features and provides an easy way to learn without attending an expensive six-month course. In three parts, this guide to building R/3 applications is ideal for software professionals, consultants, students, and IS managers and planners. Often for the purpose of preparation candidates struggle to look for important topics and browse through some valuable concepts, they feel might be asked in an interview. Such a frantic search consumes a lot of time and energy, as it requires going through high volumes of ABAP technology. In order to solve this dilemma here is SAP ABAP/4 Interview Questions Book, which is well equipped to deal with such problems. How do you program good ABAP? This book, the official SAP programming style guide, will show you how to maximize performance, readability, and stability in your ABAP programs. Many of the introductory SAP books currently on the market provide only a brief overview of ABAP. In ABAP/4 Programming the SAP/3 System, Bernd Matzke builds on this information to look in depth at the programming language at the heart of the SAP R/3 system. This new and fully updated edition of the definitive guide to ABAP/4 aims to make the fundamentals of this evolving programming language accessible to anybody developing or maintaining an SAP R/3 system. Starting with the basic principles, it explains the essential characteristics of ABAP/4 and the SAP programming concept. With this book you will learn how to: Master the ABAP/4 commands in order to analyze existing standard applications and write new programs Understand function modules to use program code from other applications Create your own programs and construct your own test environments with an expansive set of examples designed to build up knowledge and programming skills NEW! Covers new concepts affecting the development environment and program, in line with R/3 Release 4.6 NEW! Covers features of completely redesigned user interface NEW! Reference section covering ABAP commands in Release 4.6B NEW! CD-ROM containing source code of all examples plus SAP transport files with examples The sample programs in this book were developed on a 4.6B-system but can also run on other versions of the R/3 system. 'ABAP Objects' comprehensively covers the new object oriented generation of SAP's programming language ABAP. Programming with ABAP/4 - The world of sap Coding & Programming for beginner & professional This book has been written with the complete novice, SAP super-user, consultant and programmer who want to starts or builds the carrier in SAP ABAP in mind. Whether you are just starting to use SAP systems, an experienced consultant or something entirely different, if you have to use SAP in any way, then this book is for you! Explaining ABAP programming from scratch and explaining business flow of MM, SD, PP, FI/CO & HR Modules & Concepts with flow charts, tables & tcodes to guide Consultants, programmers gain confidence, get comfortable with and improve productivity using SAP ABAP. Beginners who are in their First & Second year of career with SAP ABAP will find this book beneficial the most. How the Chapters are arranged CHAPTER I - It will give you brief history on SAP, introduction to SAP R/3 architecture, system landscape, ABAP Programming structure & introduce you to the various applications with the SAP Business Suite. CHAPTER II - Helps YOU

begin using SAP ABAP Programming or Introduction to ABAP Programming on a strong note. CHAPTERS III - Get introduced to Business flow of MM, SD, PP, FI/CO & HR Modules & Concepts with flow charts, Standard Tables & Transaction Codes. CHAPTER IV - Get introduced to complete ease with ABAP Dictionary or Data Dictionary (DDIC) Navigation and a strong footing to move forward confidently. CHAPTERS V - This chapter covers the different types of ABAP Reports & Events in ABAP Reports. Topics Covered Chapter I Introduction to SAP R/3 Architecture and History of SAP Chapter II ABAP Programming Language & Structure Chapter III Business Flows Chapter IV ABAP Dictionary or Data Dictionary (DDIC) Chapter V Introduction to ABAP/4, Inner Join, For All Entries, Modularization Technique, String Operation & Control Break Statement. Chapter VI SAP Tips & Tricks Chapter VII ABAP Reports (Classical, Interactive, ALV, LDB Report & SAP query) Chapter VIII Report Parameter Selections 'SAP is an integrated ERP software catering to multiple industries, multiple geographies, spanning across almost all business functions or we can say SAP is an integration of all the business process at one place'.--Gurunanjeshwar Togurage Combine your skills in ABAP, SAP Fiori, core data services, and more to master the end-to-end development process for SAP S/4HANA applications. Learn to use the ABAP programming model for SAP Fiori to build applications from scratch, or use SAP Fiori elements to get a head start! Then, deploy your applications to SAP Fiori launchpad and get the best practices you need to operate applications post-development, including Git version control, application tests, and setting up an integration pipeline.

- a. Getting Started Get the development foundation you need and master SAP S/4HANA architecture, SAP Fiori, design-led development strategies, and the ABAP programming model for SAP Fiori.
- b. End-to-End Development Use step-by-step instructions to develop in SAP S/4HANA using core data services, SAP Gateway, OData, service adaptation description language, and BOPF. Create list reports and object pages, overview pages, analytical list pages, freestyle applications, and more.
- c. Operating Applications Once your applications are developed and exported, get the best practices you need to operate them: Git version control, automated backend and frontend testing, and continuous integration for SAPUI5 and ABAP.
