The study is based on a survey of 56 academic library web staffs with data broken out by size and type of academic institution and other criteria. The 160 page study gives exhaustive data about academic library preferences in areas such as use of mashups, library social media sites, website staff and budgets, role of the college and library IT staffs, governance of the website, content entry policies, relations with the college IT and web staff, branding issues, college web conformity issues, preferences in content management systems, programming and scripting, division of web staff time among various priorities, use of blogs, listservs, email newsletters, rss feeds and other communication vehicles, use of and plans for federated search, search box presentation strategy, and use of cascading style sheets. The study also covers ease of use issues for library staff focusing on how easy it is to perform certain website-related tasks such as entry of the same content to multiple site locations, ease of inserting and positioning videos, and ease of inserting tabular materials, among other tasks. Other issues covered include but are not limited to: use of freelancers and consultants, sources of advice, use of social bookmarking tools and much more.

Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern. "The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.
